Crystal Rain Feminized by **Amsterdam Marijuana Seeds**

Crystal Rain Feminized is the winner of the Dutch Highlife Cup in 2005 and is a plant with beautiful strong properties with both Indica and Sativa genetics. Crystal is a White Widow hybrid that has been re-back-crossed with Northern Light.

This cannabis strain is well known for possessing bushy leaves and it can be cultivated either outdoors or indoors. The buds are sticky and large covered with several THC glands, because of which, it's named Crystal. Crystal grows many side-branches with green wide leaves giving it that healthy look and growing outdoors it can reach up to heights as much as 225 cm.

The high is a pleasant bodily sensation, but also retains a lucid edge that may increase your sense of concentration.

As it grows bigger you'll find the typical White Widow characteristics combined with strong Northern Light properties that make sure the plant is resistible against bad weather influences like rot or disease.

450-Watt Full Spectrum G8LED Bloom Only by **Dorm Grow**

The 450-Watt Full Spectrum G8LED Bloom Only is a full spectrum indoor grow light, specifically designed for the flowering stage of the growth cycle. This is the ideal light for setting up a separate flowering station for your plants. G8LED has designed the G8-450 Bloom light with 8 bands of the color spectrum, including UV, plus extra red wavelengths for maximum yield. This LED will give coverage for 12 square feet (1,12 square meter) of grow space.

Penetration up to 60 inches past the plant canopy. Optimal 8-Band, with increased red spectra and ultraviolet light for a top yield. With the G8-450 Bloom light there is no need for a ballast, and no need to vent extra heat. Power cord is included. Suspension cables are included. No ballast needed.
