New seed

Caramelicious

This delicious variety has huge, fat sticky buds with a sweet caramel flavor.

New product

Milwaukee pH600 Tester

Designed for the aquarium / hydro market. The calibration procedure is very simple and fast.

New seedbank **DNA Genetics**

DNA Genetics started out growing marijuana in the late 80's in their home town Hollywood, California. They would collect seeds from friends and family, obtaining rare cannabis seeds from the best weed they could get at the time. In 2002 they moved to Amsterdam, The Netherlands.

DNA Genetics has won over 150 awards for their contributions to the cannabis industry throughout the world.

Caramelicious by Amsterdam Marijuana Seeds

This delicious variety has huge, fat sticky buds with a sweet caramel flavor. Caramelicious is a favorite after dinner smoke. Caramelicious has been bred for the last 15 years with great success, it's easy to grow – good for beginners. This indica/sativa hybrid is crossed back and selected for her sweet taste and great yield. A beautiful plant with loads of crystals, a sweet taste and a happy high!
